i Next we need to setup an environment

7 Begin by clicking on the settings gear.

8 Click "Admin center".

9 Click "Environments".

10 Click "New".

11 Choose a Name for your environment.

Try **New environment** ✕

ⓘ This operation is subject to [capacity constraints](#)

Purpose

Describe the environment's purpose

Add a Dataverse data store? ⓘ

☐ No

Pay-as-you-go with Azure? ⓘ

Managed	Region	Release Cycle	Group
Yes	United States	Standard	-

13 Click "Save" to finish creating your environment.

The screenshot shows a dialog box for creating a new environment. On the right side, there is a text area labeled "Describe the environment's purpose". Below it are two toggle switches: "Add a Dataverse data store?" and "Pay-as-you-go with Azure?", both currently set to "No". At the bottom right, there are two buttons: "Save" (highlighted with an orange circle) and "Cancel". The background shows a Windows taskbar with icons for Power Apps, Google, and a user profile, along with system icons and the time 8:51 AM on 12/26/2024.

14 Creating the environment might take a while, once it is done it will say "New environment [name] has successfully been created."

The screenshot shows the Power Platform admin center interface. A green notification banner at the top states: "New environment [Shallan's Testing environment](#) has been successfully created". Below this, the "Environments" section is visible, featuring a table with the following data:

Environment	Type	State
Shallan's Testing environment	Sandbox	Ready
Hantoni C Test	Production	Ready

The left sidebar contains navigation links for Home, Environments, Advisor, Analytics, Billing, and Resources. The top navigation bar includes "New", "Refresh", and "Recently deleted environments" options.

15

Now that we have our new environment setup, navigate back to "Make.powerapps.com".

16

Click on the Environment in the top right of the page.

17 Click on your new Environment.

 New Solution

18

Now that we are in the correct environment let's create a solution to hold the objects we will be creating, begin by Clicking "Solutions".

19

Click "New solution".

20 Give Your solution a display name and a name.

The screenshot shows the 'New solution' dialog box in the SAP S/4HANA Cloud interface. The dialog is titled 'New solution' and has a close button (X) in the top right corner. It contains the following fields:

- Display name ***: A text input field with an orange circle highlighting it.
- Name ***: A text input field.
- Publisher ***: A dropdown menu with the text 'Select a Publisher' and a plus icon to the right. Below the dropdown is a link that says '+ New publisher'.
- Version ***: A text input field.

In the background, the SAP S/4HANA Cloud interface is visible, showing a list of solutions. The first solution is 'on Data Services Default Solution'.

21 Now we need to create a publisher for the solution and its objects. Click "New publisher".

The screenshot shows the 'New publisher' dialog box in the SAP S/4HANA Cloud interface. The dialog is titled 'New publisher' and has a close button (X) in the top right corner. It contains the following fields:

- Name ***: A text input field with the value 'Myfirstsolution'.
- Publisher ***: A dropdown menu with the text 'Select a Publisher' and a plus icon to the right. Below the dropdown is a link that says '+ New publisher', which is highlighted with an orange circle.
- Version ***: A text input field with the value '1.0.0.0'.

In the background, the SAP S/4HANA Cloud interface is visible, showing a list of solutions. The first solution is 'on Data Services Default Solution'.

22 Give your new publisher a Display name and a Name.

The screenshot shows a web browser window with a 'New publisher' dialog box open. The dialog has a title bar with a close button (X). Below the title, there is a subtitle: 'Publishers indicate who developed associated solutions. [Learn more](#)'. There are two tabs: 'Properties' (selected) and 'Contact'. Under the 'Properties' tab, there are three input fields: 'Display name *' with the value 'New Publisher', 'Name *' with the value 'New Publisher', and 'Description' which is empty. The background of the browser shows a sidebar with 'd solution' and 'See his', and a main area with 'referred solution' and 'non Data Service'.

New Publisher

Name *

New Publisher

Description

23 next create a prefix, the prefix will be applied before each object that is created in the solution.

The screenshot shows a web browser window with a 'Prefix' dialog box open. The dialog has a title bar with a close button (X). Below the title, there is a subtitle: 'Prefix *'. There are two input fields: 'Choice value prefix *' with the value '73279', and 'Preview of new object name' with the value 'npub_Object'. The background of the browser shows a table with columns 'Created' and 'Version'. The 'Created' column has a dropdown arrow. The table has two rows: '5 days ago' with '1.0.0.0' and '5 days ago' with '1.0'.

Description

Prefix *

npub

Choice value prefix *

73279

Preview of new object name

npub_Object

Created ↓	Version
5 days ago	1.0.0.0
5 days ago	1.0

24 Click "Save"

5 days ago 1.0

Choice value prefix *

73279

Preview of new object name

npub_Object

Save Cancel

25 Now that the new publisher is created, we can select it by selecting the drop down.

My first solution

1.0.0.0

More options

26 Then Clicking on the newly created publisher.

27 Click "Create" to finish creating the new solution.

28

You will be automatically redirected to the solution, and you will see that it doesn't have any objects in it next.

29

We won't go into great detail on the different pieces you can add to a solution in this module, but I do want to show you the most basic pieces.

30

Click on the Automation drop down to begin creating your first automation.
